What is *A Journey to the Teachings*?

An *all-inclusive*, step-by-step curriculum package to deliver a 1 ½ day workshop for promoting injury prevention awareness in First Nations and Inuit communities.

Why was *A Journey to the Teachings* Developed?

- Injuries are a leading cause of premature death in many First Nations and Inuit communities.
- The unintentional injury rate in some of these communities is 4 to 6 times higher than in other communities in Canada.
- Leading causes of unintentional injury include motor vehicles (ATVs, snowmobiles, boats, cars, trucks), drownings, fires, and firearm injuries.

A Journey to the Teachings Objectives

- Raise awareness of the burden of injury
- Identify injury risk and protective factors
- Encourage local injury surveillance
- Mobilize communities to engage local injury prevention strategies

Who is *A Journey to the Teachings* targeted to?

1. **Workshop Facilitators (those taking the training and then delivering the workshop)**

   Community practitioners and service providers working in First Nations and Inuit communities (e.g., health managers, nurses, community health rep's)

2. **Workshop participants**

   Anyone in First Nations or Inuit communities interested in promoting local injury awareness and prevention (e.g., community leaders, teachers, social workers, youth leaders, firefighters, etc.)

Organization of *A Journey to the Teachings*

Follows a 1 ½ day "journey" through 4 stages of learning (Elder Mark Philips):

More about *A Journey to the Teachings*

- Based on *A Journey: Strengthening Aboriginal Communities through Injury Prevention*, Alberta Centre for Injury Control & Research (2001)
- Culturally relevant & traditional examples, from members of National Aboriginal Organizations and local participants in pilot sessions.
- Focuses on unintentional injuries (e.g. Fire, Falls, Motor vehicle collisions, Drowning, Poisoning)
- Also acknowledges intentional injuries (i.e. Violence, Suicide and Self-harm)
- Well-known models from injury prevention field:
  - Injury Triangle (Gordon, J.E., 1946)
  - Haddon's Matrix (Haddon, W.)
  - Injury Prevention Es (Education, Enforcement, Environment, Economics)

A Journey to the Teachings content

- Packaged as a binder with CD
- Facilitator Manual
- Facilitator Guide (curriculum)
- Slides, hand-outs, activity sheets
- Regional data on injury
- Certificate of Completion
- Evaluation form for participant feedback

Children in the Arctic learn very young to take responsibility for survival. This is because at any age everyone in the Arctic is at risk.
