

# MIDWIFERY IS A SUSTAINABLE AND CULTURALLY RESPECTFUL HEALTH CARE SERVICE FOR EXPECTANT MOTHERS

## IT'S YOUR RIGHT!

Contact your elected representative at all levels of government and ask for the return of midwifery services and education programs to your community.

The integration of Inuit midwifery practices into health care service delivery offers Inuit families a sustainable and culturally respectful service for expectant mothers, and can reduce racism experienced by Inuit women and gender-diverse Inuit in Canada's health care systems.

The return of sustainable and traditional Inuit practices and education programs is one of Pauktuutit's top priorities.
